

Agile Manager [EOL]

Review From A Customer

From IT Central Station, the leading review site for enterprise technology solutions.

Review by a Real User

Verified by IT Central Station

Project Director at a tech services company with 1,001-5,000 employees

it_user367794

HOW HAS IT HELPED MY ORGANIZATION?

It's very important to us that we're able to adapt to a lot of changes in the space in which we do business. This solution gives us flexibility in product testing and allows us to get our products with very quick time-to-market.

WHAT NEEDS IMPROVEMENT?

It requires a lot of post-process testing of our products. It would be an improvement if those test weren't necessary. Also, the DevOps process should be easier to implement at the beginning of a project because that's when it would be most effective.

FOR HOW LONG HAVE I USED THE SOLUTION?

We're in the middle of a POC.

WHAT WAS MY EXPERIENCE WITH DEPLOYMENT OF THE SOLUTION?

It's deployed just fine during our POC.

WHAT DO I THINK ABOUT THE STABILITY OF THE SOLUTION?

So far, so good on stability.

WHAT DO I THINK ABOUT THE SCALABILITY OF THE SOLUTION?

Because we're still doing a POC, we haven't really needed to scale.

HOW IS CUSTOMER SERVICE AND TECHNICAL SUPPORT?

We work with a French third-party team and they help us with specific issues.
