VALUABLE FEATURES:

Analyzer
Fireflow
Business flow

IMPROVEMENTS TO MY ORGANIZATION:

It's helped optimize our firewall configuration and eased our troubleshooting.

ROOM FOR IMPROVEMENT:

The reporting feature needs work.

USE OF SOLUTION:

I've used it for six months.

SCALABILITY ISSUES:

It's expensive to get new licenses.

INITIAL SETUP:

It was straightforward.

IMPLEMENTATION TEAM:

We used a vendor team who were 9/10.

COST AND LICENSING ADVICE:

It is expensive, but it's worth it.

OTHER SOLUTIONS CONSIDERED:

I tested Firemon which is great, the only problems were the lack of a web GUI interface and our Apple clients couldn't connect to it.

We also looked at ManageEngine.

OTHER ADVICE:

Go ahead if you can afford it!
