VALUABLE FEATURES:

TestingAnywhere is an Scriptless Automation Tool which is easy to learn and implement. A lot of features present in this tool are effective during automation. Test cases are created using one of five methods (web recording, object recording, image recognition, Smart recording, editor). These test cases are recorded, saved, and can be edited and enhanced.

One more feature that is very unique is the conversion of Automated TestCase in to Executable (EXE) files so that testers can run them on remote machines too.

IMPROVEMENTS TO MY ORGANIZATION:

We wanted to run the Automated TestCase prepared in TestingAnywhere from another tool. So the *.exe file came in handy.

ROOM FOR IMPROVEMENT:

I haven't gone deep in the tool, but so far it looks good.
