Roman Rauchwarter

Systems Analyst at a tech services company with 1-10 employees

WHAT IS OUR PRIMARY USE CASE?

We are using mainly Workload Automation for all types of jobs over different servers and operating systems.

HOW HAS IT HELPED MY ORGANIZATION?

Without automation, it would be nearly impossible to do all the jobs that we are doing.

WHAT IS MOST VALUABLE?

It is flexible. We can do additional scripting in Automic script, in combination with JSL language.

WHAT NEEDS IMPROVEMENT?

Documentation is not great. It was previously much better. I would like to see features from "Prompt" sets in read Masks.

WHAT DO I THINK ABOUT THE STABILITY OF THE SOLUTION?

At the moment, we are using 2.0. The job automation is okay. The main functions are stable. There are bugs though.

WHAT DO I THINK ABOUT THE SCALABILITY OF THE SOLUTION?

It is scalable.

WHICH SOLUTIONS DID WE USE PREVIOUSLY?

We used just shell scripts and crontab.

HOW WAS THE INITIAL SETUP?

The initial setup was straightforward.

WHAT WAS OUR ROI?

In some of our departments, it has had a great impact on efficiency, costs, and resources.

WHAT OTHER ADVICE DO I HAVE?

I would recommend Workload Automation.
