Coordinator Network Support at a manufacturing company with 501-1,000 employees

Moraima Matilda

WHAT IS OUR PRIMARY USE CASE?

It is our firewall solution. We connect to other locations, as well as use programs in-house.

WHAT IS MOST VALUABLE?

The most valuable feature is the security that it provides our company and users. Furthermore, our company uses it for making rules for the bank to connect to our server in the DMZ, which is a security challenge.

WHAT NEEDS IMPROVEMENT?

It needs improvement as a "Next-Generation" firewall solution. In addition, it needs to be more user-friendly.

FOR HOW LONG HAVE I USED THE SOLUTION?

More than five years.

WHAT DO I THINK ABOUT THE STABILITY OF THE SOLUTION?

There is no downtime, and it is working great.

WHAT DO I THINK ABOUT THE SCALABILITY OF THE SOLUTION?

It is scalable. We have had no issues.

WHAT'S MY EXPERIENCE WITH PRICING, SETUP COST, AND LICENSING?

The initial setup was complex. But, after that, to maintain and keep creating rules it was easy.
