Unified Network Architect at Barry-Wehmiller

**Andrew  
Svolopoulos**

### **WHAT IS OUR PRIMARY USE CASE?**

This solution is the backbone of our data center. It is the fabric to our UCS blade servers.

### **WHAT NEEDS IMPROVEMENT?**

In the next release of this solution, I would like to see a focus on backplane deployment, so you can stack more.

### **WHAT DO I THINK ABOUT THE STABILITY OF THE SOLUTION?**

In terms of stability, this solution is rock solid. We've had no issues with it.

### **WHAT DO I THINK ABOUT THE SCALABILITY OF THE SOLUTION?**

I would say that to make this solution more scalable, they need to provide a backplane as they do on a lot of their other network infrastructure equipment.

### **HOW ARE CUSTOMER SERVICE AND TECHNICAL SUPPORT?**

Technical support for this solution is excellent.

### **WHICH SOLUTION DID I USE PREVIOUSLY AND WHY DID I SWITCH?**

We have been using the Nexus line for more than ten years. I don't remember what the previous model was, but it had good reliability and everybody knew how to use it, so we just upgraded.

### **HOW WAS THE INITIAL SETUP?**

The initial setup of this solution was straightforward.

**WHAT ABOUT THE IMPLEMENTATION TEAM?**

We used InterVision to assist us with the implementation, and they did an outstanding job.

**WHAT'S MY EXPERIENCE WITH PRICING, SETUP COST, AND LICENSING?**

This solution should be made more affordable.

**WHAT OTHER ADVICE DO I HAVE?**

This is a product that I recommend people look at, but it would be nice if it were more affordable. I would rate this solution an eight out of ten.
