VALUABLE FEATURES:

The Xeon variants and large amount of RAM the server board supports is to our liking. Also the ease of which the machine can be upgraded. We had no difficulty with any hardware additions. Lastly, we enjoy the great warranty and quality of the product.

IMPROVEMENTS TO MY ORGANIZATION:

The ease of working with our suppliers and the availability of the product.

ROOM FOR IMPROVEMENT:

I can't think of anything, as it is a good product.

DEPLOYMENT ISSUES:

We did not run into any problems.

STABILITY ISSUES:

We did not run into any problems.

SCALABILITY ISSUES:

We did not run into any problems.

COST AND LICENSING ADVICE:

It is a pricey server in comparison to its competitors, but it doesn't lack in any of its capability. It still is great value for money and the product has great after sales support.

OTHER SOLUTIONS CONSIDERED:

We chose Dell because it is a well-known brand and this was one of the buying factors for us. We find that trusted brands benefit not only our clients, but us as a reseller as well.
