### **WHAT IS OUR PRIMARY USE CASE?**

It's the storage backbone for our virtual environment. So far the performance has been very good.

### **WHAT IS MOST VALUABLE?**

Replication Uptime I/O

### **WHAT NEEDS IMPROVEMENT?**

I would like to see higher compression, dedupe, faster I/O, and bigger drives.

### **FOR HOW LONG HAVE I USED THE SOLUTION?**

One to three years.

### **WHAT DO I THINK ABOUT THE STABILITY OF THE SOLUTION?**

I have no complaints, so far, about the stability.

### **WHAT DO I THINK ABOUT THE SCALABILITY OF THE SOLUTION?**

It's very easy to scale.

### **HOW IS CUSTOMER SERVICE AND TECHNICAL SUPPORT?**

I have not needed to use technical support yet.

### **WHICH SOLUTIONS DID WE USE PREVIOUSLY?**

We had old technology. We wanted to move to stuff that's more VMware-aware. Our most important criterion when selecting a vendor is price.

### **WHAT'S MY EXPERIENCE WITH PRICING, SETUP COST, AND LICENSING?**

We have found the solution to be somewhat affordable. The scalability seems a bit more expensive than even buying a brand new one so far. That has been kind of a drawback.

### **WHAT OTHER ADVICE DO I HAVE?**

Do your research, check out all the vendors, and get your hands on it as much as possible.
