**HassanZaki**

### **WHAT IS OUR PRIMARY USE CASE?**

We primarily use the solution for custom development and customer case studies.

### **WHAT IS MOST VALUABLE?**

The solution's most valuable feature is its high performance.

### **WHAT NEEDS IMPROVEMENT?**

The deployment of the solution could be simplified. The solution should be integrated into the system by default and not separately.

### **WHAT DO I THINK ABOUT THE STABILITY OF THE SOLUTION?**

The solution is very stable.

### **WHAT DO I THINK ABOUT THE SCALABILITY OF THE SOLUTION?**

The solution is scalable for SMBs.

### **HOW ARE CUSTOMER SERVICE AND TECHNICAL SUPPORT?**

Technical support is okay.

### **HOW WAS THE INITIAL SETUP?**

The implementation isn't exactly complex, but the solution should have some enhancements in it to make the process more centralized.

### **WHAT'S MY EXPERIENCE WITH PRICING, SETUP COST, AND LICENSING?**

The pricing is okay. It tends to offer some of the best pricing, but I still think it could be better.

### **WHAT OTHER ADVICE DO I HAVE?**

We are using the on-premises deployment model. My advice to those who plan on implementing the solution is to make sure you are doing accurate sizing. Don't just size for your current use only. I would rate the solution nine out of ten.
