WHAT IS OUR PRIMARY USE CASE?

I am using this as a lab costing application. It is pretty fast.

HOW HAS IT HELPED MY ORGANIZATION?

You can easily deploy it in different platforms and cloud providers. You are actually deploying container to container.

WHAT IS MOST VALUABLE?

The commissioning is very fast.

WHAT NEEDS IMPROVEMENT?

I think this solution needs better security due to rising threats from the outside world.

FOR HOW LONG HAVE I USED THE SOLUTION?

One to three years.

WHAT DO I THINK ABOUT THE STABILITY OF THE SOLUTION?

The product is stable.

WHAT DO I THINK ABOUT THE SCALABILITY OF THE SOLUTION?

I am not scaling it very much at this time. I only have about 20 users at present. The roles of the users are information users, managers and middle managers.

It was straightforward for us.

WHAT'S MY EXPERIENCE WITH PRICING, SETUP COST, AND LICENSING?

The pricing and licensing really depends on what your needs are. You could be paying \$100 a month to \$100,000. It depends on the needs you have from the solution, and the agreement you make.
