Adrien Gibrat

WHAT IS MOST VALUABLE?

What I like most about Docker is that it is straightforward and easy to use, yet powerful. The graphical interface is very user-friendly and reporting is fast and effective.

WHAT NEEDS IMPROVEMENT?

Sometimes it is difficult to access the quality of information on Docker. I also feel that it is not a 100% secure product and I'd say there is room for improvement in the security area and functionality. I would also like to see more features inside Docker as well as more integration with different solutions.

FOR HOW LONG HAVE I USED THE SOLUTION?

I've been using Docker for three to four years now on premises.

WHAT DO I THINK ABOUT THE STABILITY OF THE SOLUTION?

The solution isn't always that stable.

WHAT DO I THINK ABOUT THE SCALABILITY OF THE SOLUTION?

I believe Docker is scalable.

HOW ARE CUSTOMER SERVICE AND TECHNICAL SUPPORT?

I like their technical support but I mostly use their external documentation.

HOW WAS THE INITIAL SETUP?

The initial setup was really easy and the deployment was fast and straightforward. I did everything myself.

WHAT'S MY EXPERIENCE WITH PRICING, SETUP COST, AND LICENSING?

We use the free version of Docker.

WHICH OTHER SOLUTIONS DID I EVALUATE?

I don't use any other software, given that Docker is our solution.

WHAT OTHER ADVICE DO I HAVE?

My advice to others is to just do it. It is a no-brainer. I really recommend this solution and on a scale from one to ten, my rating is a nine.
