font size='9.5'>b>WHAT IS MOST VALUABLE?/b>/font>

It's easy to plan work.

font size='9.5'>b>HOW HAS IT HELPED MY ORGANIZATION?/b>/font>

Easy collaboration between several development teams such as design, development, and testing. It's also simple to get an overview of a project's status.

font size='9.5'>b>WHAT NEEDS IMPROVEMENT?/b>/font>

SVN integration  
The ability to change project templates for projects in-progress

For how long have I used the solution?

I've used it for three years.

What was my experience with deployment of the solution?

No issues encountered.

What do I think about the stability of the solution?

No issues encountered.

What do I think about the scalability of the solution?

There were issues, but they have been solved.

Which solution did I use previously and why did I switch?

No previous solution was used.

How was the initial setup?

It was easy.

What about the implementation team?

We did it in-house.

What was our ROI?

Project realization has been carried out much faster.

Which other solutions did I evaluate?

No we didn't.

What other advice do I have?

Be careful when selecting suitable project templates, as there's no way of changing it later.
