VALUABLE FEATURES:

I think the most valuable feature is the service-level agreement.

IMPROVEMENTS TO MY ORGANIZATION:

It's made us operate our business more efficiently. We're able to function with greater cost efficiently utilization of IT resources.

ROOM FOR IMPROVEMENT:

Intensive testing is required before version/product release as there are many bugs and other issues.

DEPLOYMENT ISSUES:

It deploys with many issues.

STABILITY ISSUES:

It's unstable.

SCALABILITY ISSUES:

It scales OK.

OTHER ADVICE:

It's an excellent tool if you want to effectively use resources (servers/CPU/cores/memory).
