### WHAT IS MOST VALUABLE?

The Mapping Configuration and PowerCenter wizards are valuable. We use them to run our business logic.

### HOW HAS IT HELPED MY ORGANIZATION?

Provides the basic functionalities to implement ETL logic Can be accessed from a web browser or from any device with internet connectivity. We need not be in the office to perform tasks We use it to run jobs, even at midnight, based on the requests of the business users.

### WHAT NEEDS IMPROVEMENT?

It needs lot of improvement from the admin to the development side. There are many known issues while mapping. The error information provided is not informative, as compared to Power Center.

### FOR HOW LONG HAVE I USED THE SOLUTION?

I have used this solution for around six months.

### WHAT DO I THINK ABOUT THE STABILITY OF THE SOLUTION?

There used to be performance issues. Throughput is slow when we do not have the Informatica Secure Agent running on the DB instance.

### WHAT DO I THINK ABOUT THE SCALABILITY OF THE SOLUTION?

It has not yet been identified.

### **HOW ARE CUSTOMER SERVICE AND TECHNICAL SUPPORT?**

I would give the technical support a rating of 2/5. Informatica doesn't provide on-call or technical support for AWS instances. We need to rely on responses from the forums if we raise any queries.

### **WHICH SOLUTION DID I USE PREVIOUSLY AND WHY DID I SWITCH?**

I have used Power Center. I switched to the Informatica Cloud (IC), as it is cheaper compared to Power Center. It gave us a chance to explore a new tool and technology.

### **HOW WAS THE INITIAL SETUP?**

The setup is straightforward

### **WHAT'S MY EXPERIENCE WITH PRICING, SETUP COST, AND LICENSING?**

It is cost effective and an easily accessible tool.

### **WHAT OTHER ADVICE DO I HAVE?**

It totally depends on the business requirements and the budget. I have been working on Informatica for more than nine years, and I recommend using their products.
