WHAT IS OUR PRIMARY USE CASE?

It is a basic firewall that we have been using for six years. It is a good solution.

WHAT IS MOST VALUABLE?

The most valuable feature is the brand itself. From a protection perspective, it provides a network perimeter security function for our company.

WHAT NEEDS IMPROVEMENT?

We are finding that the UTM features which is required (like an antivirus or URL filtering) are not available. We are now looking for the "Next Generation" of firewall protection. We need to be less vulnerable to attacks. In addition, we would really like to see an automated policy feature added.

FOR HOW LONG HAVE I USED THE SOLUTION?

More than five years.
