Engineer at ALC Vitalyur

★★★★★

### WHAT IS MOST VALUABLE?

The stability, speed, and reliability are the solution's best features. The information is also very secure. The user interface is very intuitive.

### WHAT NEEDS IMPROVEMENT?

For us, in our country, the solution is a bit expensive. They should try to work on a better pricing model for our market. NetApp could improve the speed of the rebuilding rate.

### FOR HOW LONG HAVE I USED THE SOLUTION?

I've been using the solution for three years.

### WHAT DO I THINK ABOUT THE STABILITY OF THE SOLUTION?

The solution is very stable.

### HOW ARE CUSTOMER SERVICE AND TECHNICAL SUPPORT?

I'm satisfied with technical support. I've called them several times and they were very good.

### HOW WAS THE INITIAL SETUP?

The initial setup was very easy. Deployment only took one or two days of light work.

### WHAT OTHER ADVICE DO I HAVE?

We are using the on-premises deployment model. I would recommend this product for high-speed database applications. I would rate the solution nine out of ten.
