WHAT IS MOST VALUABLE?

Ease of use
Lack of performance problems for analytics and massive data systems
Integration with Linux-based ETL and data streaming technologies
Integration with distributed computing platforms

HOW HAS IT HELPED MY ORGANIZATION?

It has been the primary driving technology behind the corporate wide transition to Netezza as a standard data platform. A whole ecosystem is beginning to develop around the product.

WHAT NEEDS IMPROVEMENT?

It is not designed for transactional systems. Transactional systems that require frequent updates, deletes, etc should use a different solution.

WHAT DO I THINK ABOUT THE STABILITY OF THE SOLUTION?

Netezza does not perform well with a significant volume of individual record operations. Netezza is designed specifically for set based operations.

WHAT DO I THINK ABOUT THE SCALABILITY OF THE SOLUTION?

Netezza does not perform well with a significant volume of individual record operations. Netezza is designed specifically for set based operations.

Netezza

IBM. Netezza
