## Review by a Real User

Verified by IT Central Station

Jr. Network Administrator at a manufacturing company with 501-1,000 employees

**it\_user560973**

### **WHAT IS MOST VALUABLE?**

Flexible scaling for future-proof and Nimble InfoSight, easy and clear to use reporting portal.

### **HOW HAS IT HELPED MY ORGANIZATION?**

Centralize storage location for data and virtualized servers. Minimum experiences with downtime. Data compression ratio seems reasonable comparing to claims.

### **WHAT NEEDS IMPROVEMENT?**

Pricing.

### **FOR HOW LONG HAVE I USED THE SOLUTION?**

4-5 years.

### **WHAT DO I THINK ABOUT THE STABILITY OF THE SOLUTION?**

Generally speaking, no. However, just yesterday we experienced a volume failure, took down an essential production server. Still in the middle of investigation, will log a case with Nimble soon.

### **WHAT DO I THINK ABOUT THE SCALABILITY OF THE SOLUTION?**

We are currently in the stage of planning to scale up, from what we were promised it should be trouble free.

### **HOW ARE CUSTOMER SERVICE AND TECHNICAL SUPPORT?**

I've yet dealt with technical support which is a good sign. The rep from Nimble and Engineers were helpful when I had question in regards of our scaling up project.

### **WHICH SOLUTION DID I USE PREVIOUSLY AND WHY DID I SWITCH?**

Yes, the decision was made before I joined the company, however, I believe it was due to pricing and the shift of our strategy.

### **WHAT'S MY EXPERIENCE WITH PRICING, SETUP COST, AND LICENSING?**

Seems to be competitive and reasonable, however, with industry shifting focus onto cloud platform, many small-midsize businesses are limited to what we are offered.

### **WHICH OTHER SOLUTIONS DID I EVALUATE?**

We previously had Dell EqualLogic It was considered when it's time for renewal.

### **WHAT OTHER ADVICE DO I HAVE?**

Keep future needs in mind. Data might grow at a rate that surprises you.
