WHAT IS MOST VALUABLE?

I find the solution to be user-friendly. It has a lot of reports and easy settings.

WHAT NEEDS IMPROVEMENT?

On the customer-side, because I'm a small business, I need a cheaper or free solution option. To scale, you need a different package application. It's not compatible with pfSense. Maybe there should be a different package or a different setup, but it's a problem. I need a little package because I'm a small business. It would be nice if the solution offered virtual servers in the future. Compatible mutual servers with firewall specifications.

FOR HOW LONG HAVE I USED THE SOLUTION?

I've been using the solution for 6 months.

WHAT DO I THINK ABOUT THE STABILITY OF THE SOLUTION?

The solution is stable. There are about 10 people using this solution.

WHAT DO I THINK ABOUT THE SCALABILITY OF THE SOLUTION?

This solution is scalable. I may scale in the future.

HOW ARE CUSTOMER SERVICE AND TECHNICAL SUPPORT?

I don't contact technical support. I don't need to.

IF YOU PREVIOUSLY USED A DIFFERENT SOLUTION, WHICH ONE DID YOU USE AND WHY DID YOU SWITCH?

I used to use pfSense. I switched because OPNsense is modern and new. The graphic interface is good. And sometimes pfSense is not stable. Sometimes it breaks the line and stops.

HOW WAS THE INITIAL SETUP?

The initial setup was easy. Deployment took about one day, maybe two. I do the deployment and handle the maintenance myself, so you only need one person to manage it.

WHAT ABOUT THE IMPLEMENTATION TEAM?

I did the implementation myself.

WHAT'S MY EXPERIENCE WITH PRICING, SETUP COST, AND LICENSING?

It costs about \$1000.

WHAT OTHER ADVICE DO I HAVE?

I would rate this solution 10 out of 10.
