VALUABLE FEATURES

The users can take a deep dive into their business processes with the rich infographics suite. Necto has more than 2,000 infographics in its library. The exception handling capabilities of Necto is powerful one which includes bubble up exception, automated insights, root cause analysis and they are just a couple of clicks away... Another prominent feature of Necto is its real time collaborative decision making. A group of decision makers can collaborate with each other and compile a meaningful real time analysis.

ROOM FOR IMPROVEMENT

Support for bi directional language is not powerful. (Arabic, Hebrew) BIGDATA is questionable

USE OF SOLUTION

1 year

DEPLOYMENT ISSUES

Deployment is smooth and installation is very easy.

STABILITY ISSUES

No

SCALABILITY ISSUES

No

CUSTOMER SERVICE AND TECHNICAL SUPPORT

Customer Service: I have not used Customer Service. Technical Support: I have not used Technical Support.

PREVIOUS SOLUTIONS

I used OBIEE previously. The reason for switching to Necto is its easy to use with 3rd party integration and has a rich Infographics service. Also, Necto is very strong in collaborative reporting.

INITIAL SETUP

Initial setup is very straightforward and easy to implement.

IMPLEMENTATION TEAM

It was an in-house implementation.

ROI

ROI is excellent. e.g. Dashboard sharing, Scheduling of reports. Predictive analytics. These are some of the most striking returns we got in our datawarehouse.
