VALUABLE FEATURES

It has the same features as paid-for databases such as Oracle and SyBase.

IMPROVEMENTS TO MY ORGANIZATION

It's saved us money as it's free.

ROOM FOR IMPROVEMENT

Eliminate the transaction wraparound possibility. If transaction wraparound occurs it can be a major problem.

USE OF SOLUTION

I've used it for two years.

DEPLOYMENT ISSUES

There were no issues deploying it for us.

STABILITY ISSUES

We've experienced no issues with performance.

SCALABILITY ISSUES

There have been no issues scaling it for our needs.

CUSTOMER SERVICE AND TECHNICAL SUPPORT

There is none available as it's a community driven solution.

INITIAL SETUP

It's simple to get it up and running.

IMPLEMENTATION TEAM

We did it in-house.

OTHER SOLUTIONS CONSIDERED

We tested a big portion of our online API product using SoapUI and it was very fast and efficient.

OTHER ADVICE

Use this product for simple needs if you do not have PostgreSQL expertise. If you have PostgreSQL expertise you can run your business off PostgreSQL.
