### **WHAT IS OUR PRIMARY USE CASE?**

Our primary use case is making dashboards, executive summaries, and creating an interactive analysis for several teams. Some of these teams are tech-savvy and thus are able to analyze the data themselves. For them, we also provide complex and relational analysis.

### **HOW HAS IT HELPED MY ORGANIZATION?**

This solution has definitely improved our organization. People are able to drill down information, see visual maps, and create a robust analysis. We provide teams with useful information and analysis to aid in decision-making. Using these dashboards, teams are able to make decisions faster than they otherwise could. Also, in some cases, we have overlapping applications.

### **WHAT IS MOST VALUABLE?**

The most valuable feature is the drag-and-drop dashboard building, with many types of visuals. Users are allowed to present multiple reports, side-by-side, using dashboard components on a single dashboard page layout. Dashboard components come in a variety of chart types, and we can customize how data is grouped, summarized, and displayed for each component. The drag-and-drop dashboard builder is an intuitive interface for building dashboards from source reports.

### **WHAT NEEDS IMPROVEMENT?**

This solution would be improved by adding some Artificial Intelligence (AI), Machine Learning (ML), and Deep Learning (DL) components that are easier to interpret and design. Maybe adding a module where we can drag and drop various models, test them in a sandbox, and test the outputs before putting them into production would be helpful.

### **FOR HOW LONG HAVE I USED THE SOLUTION?**

Two years.

**WHAT DO I THINK ABOUT THE STABILITY OF THE SOLUTION?**

This is a very stable solution.

**WHAT DO I THINK ABOUT THE SCALABILITY OF THE SOLUTION?**

This solution seems very scalable in terms of data and sharing.

**IF YOU PREVIOUSLY USED A DIFFERENT SOLUTION, WHICH ONE DID YOU USE AND WHY DID YOU SWITCH?**

We did not use another solution prior to this one.

**HOW WAS THE INITIAL SETUP?**

The initial setup is straightforward.

**WHAT ABOUT THE IMPLEMENTATION TEAM?**

We implemented this solution with an in-house team.

**WHAT'S MY EXPERIENCE WITH PRICING, SETUP COST, AND LICENSING?**

I suggest talking to the Account managers, as they are very resourceful and responsive.

**WHICH OTHER SOLUTIONS DID I EVALUATE?**

We did not evaluate other solutions before choosing this one.
