## Review by a Real User

Verified by IT Central Station

Customer Technical Leader for Galeries Lafayette at a tech company with 10,001+ employees

**it\_user255882**

### **VALUABLE FEATURES**

The top one for me is that the vulnerabilities are kept up to date.

### **IMPROVEMENTS TO MY ORGANIZATION**

It has reduced the cost of ownership for the engineers who can launch scans on the customers' networks.

### **ROOM FOR IMPROVEMENT**

I'm convinced it could be possible to do a simpler interface.

### **USE OF SOLUTION**

I used it for about four years.

### **DEPLOYMENT ISSUES**

No issues encountered.

### **STABILITY ISSUES**

There is an issue with the web browser, but it's not an issue with the product itself.

### **SCALABILITY ISSUES**

No issues encountered.

### **CUSTOMER SERVICE AND TECHNICAL SUPPORT**

Customer Service: 9/10. Technical Support: 8/10.

### **PREVIOUS SOLUTIONS**

I switched due to the cost.

### **INITIAL SETUP**

It was simple because it's only used for external scans.

### **PRICING, SETUP COST AND LICENSING**

You have to find the best solution regarding functions and cost.

### **OTHER SOLUTIONS CONSIDERED**

Tripwire Nessus Accunetix Opendvas

### **OTHER ADVICE**

Take your time Study all the functionalities of the product Try to set it up in a lab first before your production environment.
