IT Security Manager at a tech company with 1,001-5,000 employees

**ITgov9887**

### **WHAT IS OUR PRIMARY USE CASE?**

We use it for antivirus.

### **HOW HAS IT HELPED MY ORGANIZATION?**

In the past, we were not able to identify a few viruses, but now we are able to identify them because of the machine learning feature.

### **WHAT IS MOST VALUABLE?**

The machine learning module is the most valuable feature.

### **WHAT NEEDS IMPROVEMENT?**

The reporting needs improvement and I would like to see a more granular level of administrative privileges.

### **FOR HOW LONG HAVE I USED THE SOLUTION?**

One to three years.

### **HOW WAS THE INITIAL SETUP?**

The initial setup was straightforward. It wasn't a long project, it took six months.

### **WHAT OTHER ADVICE DO I HAVE?**

I would rate this solution a seven out of ten. We don't have a plan to increase the usage, it is purely based on our business requirements. This product is nothing but different from a traditional anti-virus. We were very apprehensive to try it. Once we tried it, it gave us a good impression.
