WHAT IS MOST VALUABLE?

Intercept X is the most valuable feature in the solution. It's more or less pretty standard. The endpoint feature allows you to basically see what is happening, and stop a wide range of threats. It's been the most unique identifier for Sophos.

WHAT NEEDS IMPROVEMENT?

Deployment and central management need to be improved. In the next release, the solution should add anti-spam. They should add a plugin and or a browser plugin for security.

WHAT OTHER ADVICE DO I HAVE?

We're Sophos resellers. I'd rate the solution eight out of ten. It's not 100% perfect, but it's a good product.
