### **WHAT IS OUR PRIMARY USE CASE?**

Sales dashboards for management, which were implemented initially in v.10.2, then upgraded systematically with new releases to v.10.5.

### **HOW HAS IT HELPED MY ORGANIZATION?**

The solution is being delivered to our customer, who appreciates the insights generated from the reports. It is easy for them to drill into the details and use interactive charts. This provides a great value-added once stepped out from the Excel tables era.

### **WHAT IS MOST VALUABLE?**

Definitely ease of use and interactivity. We found Tableau has the quickest learning time out of the few other BI reporting tools that we have used.

### **WHAT NEEDS IMPROVEMENT?**

We would much appreciate an option for copying/moving objects between different pages and a possibility for teamwork when working on the same dashboards.

### **FOR HOW LONG HAVE I USED THE SOLUTION?**

One to three years.
