Talend Data Quality

Review From A Customer

From IT Central Station, the leading review site for enterprise technology solutions.

Review by a Real User

Verified by IT Central Station

Associate Team Lead at a tech services company with 51-200 employees

Jugal Dhrangadharia

HOW HAS IT HELPED MY ORGANIZATION?

Data Quality easily identifiable instead of manual finding and cleaning the data through Excel (earlier used to follow) before ETL.

WHAT IS MOST VALUABLE?

Currently the best open source data quality tool available as compared to other open DQ tools ('DataCleaner', 'Open Source Data Quality & Profiling') for a variety of reasons: Vast connectors to different DB, Web, CRM, etc Custom code is allowed Wide range of advanced algorithms Recommended for advanced users Detailed analysis, etc Large community of users The most valuable features for us are: custom code, connectors, algorithms.

WHAT DO I THINK ABOUT THE STABILITY OF THE SOLUTION?

As it is an open source tool, some minor bugs are there.

HOW WAS THE INITIAL SETUP?

Fairly straightforward. Lots of user guides and tutorials are available to get started.

WHAT'S MY EXPERIENCE WITH PRICING, SETUP COST, AND LICENSING?

The best part is that it is open source.

WHAT OTHER ADVICE DO I HAVE?

Great product, surely give it a try.
