VALUABLE FEATURES

Continuous integration Build templates Triggers Plugins Platform independence

IMPROVEMENTS TO MY ORGANIZATION

We used do all of our product development builds using .net and Java languages. It is very useful to setup build agents in a Unix platform for all kinds of Unix builds.

ROOM FOR IMPROVEMENT

Deployment functions need work.

USE OF SOLUTION

I've used it for two years.

DEPLOYMENT ISSUES

We had an issue when we customized TeamCity for deployment functions in a Windows environment using PowerShell scripting.

STABILITY ISSUES

No issues encountered.

SCALABILITY ISSUES

No issues encountered.

CUSTOMER SERVICE AND TECHNICAL SUPPORT

Customer Service: Good. I would give them a 9/10. Technical Support: Good. I would give them a 9/10.

PREVIOUS SOLUTIONS

No previous solution was used.

INITIAL SETUP

Simple and easy to integrate with Subversion source code tool.

IMPLEMENTATION TEAM

We used an in-house team whose expertise was 9/10.

OTHER ADVICE

It was simple and easy to use. Great features which are always customizable.
