Senior Systems Engineer, Virtualization at a insurance company with 501-1,000 employees

Rob Kawecki

VALUABLE FEATURES:

Compression and the Tintri UI in general. Very easy to see what VMs are consuming the most amount of resources and where the latency is (host, network, storage).

IMPROVEMENTS TO MY ORGANIZATION:

Much less storage management than both of our other SANs. Traditionally it's very hard to troubleshoot perceived storage performance issues of a single VM when it's on a shared LUN with other VMs; with Tintri it's a snap.

ROOM FOR IMPROVEMENT:

Not a fan of SyncVM being an additional license. Dedupe is only at the clone level; no overall dedupe process.

USE OF SOLUTION:

6 Months

DEPLOYMENT ISSUES:

None. This storage appliance is a breeze to install and configure.

STABILITY ISSUES:

None. This is a rock solid device. We have run high workload on the device while applying OS update on it with no issue.

CUSTOMER SERVICE:

Great customer service; if there is an issue they often know before I do and have a ticket already in progress.
