WHAT IS OUR PRIMARY USE CASE?

We use SecureTrack for troubleshooting, APG (Automatic Policy Generator), implementation of new requests, change monitoring, rule and object usage reports. This solution provides an unified display of rules across vendors. We use this solution e.g. for cleanup and processing of shadowed rules.

HOW HAS IT HELPED MY ORGANIZATION?

Using this solution saves us time and money. The Automatic Policy Generator saves time because we are able to identify the required policy when a client doesn't know what he needs. We are able to perform an inventory analysis for colleagues.

WHAT IS MOST VALUABLE?

The most valuable feature of this solution is APG, the Automatic Policy Generator. Further there are very good capabilities for policy browsing and reporting implemented.

WHAT NEEDS IMPROVEMENT?

I would like to see better report integration in this solution.

FOR HOW LONG HAVE I USED THE SOLUTION?

I have been using this solution for ten years.

WHAT DO I THINK ABOUT THE STABILITY OF THE SOLUTION?

I would rate the stability of this solution a nine out of ten.

WHAT DO I THINK ABOUT THE SCALABILITY OF THE SOLUTION?

The scalability of this solution is ok.

HOW ARE CUSTOMER SERVICE AND TECHNICAL SUPPORT?

The technical support team for this solution is very polite. There was some functionality in the integration with Check Point that was initially working not in the best matter, and it was only fixed after Check Point got involved.

WHICH SOLUTION DID I USE PREVIOUSLY AND WHY DID I SWITCH?

We did not use another solution prior to this one.

HOW WAS THE INITIAL SETUP?

The initial setup of this solution was not complex. It was simple.

WHAT ABOUT THE IMPLEMENTATION TEAM?

Our in-house team handled the implementation and deployment of this solution.

WHAT'S MY EXPERIENCE WITH PRICING, SETUP COST, AND LICENSING?

Tufin is expensive but it is very good.

WHICH OTHER SOLUTIONS DID I EVALUATE?

We did evaluate other options. However, Tufin was the best one that we tried.
