Review From A Customer

From IT Central Station, the leading review site for enterprise technology solutions.

Review by a Real User

Verified by IT Central Station

Systems Architect at a aerospace/defense firm with 51-200 employees

it_user96945

VALUABLE FEATURES

Easy images from current diagrams for use in reports and architecture documents.

IMPROVEMENTS TO MY ORGANIZATION

Like any reasonable Architecture Tool, it produces standard views and allows passing a file with work in it to others.

ROOM FOR IMPROVEMENT

Many missing diagram formats, incomplete support for DoDAF, ToGAF and similar, sharing should come built in to the product and not be like so many other architecture tools where any time you need some it is at additional cost.

USE OF SOLUTION

2 years.

DEPLOYMENT ISSUES

No issues with deployment.

STABILITY ISSUES

Not significant with current versions.

SCALABILITY ISSUES

No built in teamwork.

CUSTOMER SERVICE AND TECHNICAL SUPPORT

Online support is very lacking and appears to be an entre' for paid support.

PREVIOUS SOLUTIONS

Used Rational Rose and Systems Architect in the past. Moved to a new company where this was the standard.

ROI

Reduces time and provides better products than PowerPoint engineering.

OTHER ADVICE

Get a bundle deal from the vendor with teamwork built in.
