Technical Support at a energy/utilities company with 5,001-10,000 employees

C7843E

WHAT IS OUR PRIMARY USE CASE?

We are using the VMware vSphere product to virtualize our servers and we are very succesful. We are very satisfied.

WHAT IS MOST VALUABLE?

It provides a new environment in an expedient manner. It is a better use of resources between the servers. As we can use these resources better, it helps our TCO (Total Cost of Ownership) analysis.

WHAT NEEDS IMPROVEMENT?

We would like VMware to add capacity to add more equipment. We also think it could improve with the hyper-converged.

FOR HOW LONG HAVE I USED THE SOLUTION?

One to three years.

WHAT DO I THINK ABOUT THE STABILITY OF THE SOLUTION?

It is very stable.

WHAT DO I THINK ABOUT THE SCALABILITY OF THE SOLUTION?

It is very scalable. We like that it is very functional and it has ability to access hyper-conversions. There is a capacity to grow the environment by adding the same type of equipment, and that really interests us.

HOW ARE CUSTOMER SERVICE AND TECHNICAL SUPPORT?

I do not have experience with the technical support team.

WHICH SOLUTION DID I USE PREVIOUSLY AND WHY DID I SWITCH?

We looked at Microsoft Hyper-V, but it does not have all of the systematics of VMware vSphere.

WHAT'S MY EXPERIENCE WITH PRICING, SETUP COST, AND LICENSING?

I think that vSphere is an expensive solution.
