Senior Enterprise Architect at a healthcare company with 11-50 employees

SenEnt299245

WHAT IS OUR PRIMARY USE CASE?

It performs well.

HOW HAS IT HELPED MY ORGANIZATION?

It is connected with our systems, and our systems run on Oracle. It is beneficial because it integrates with our internal systems. This resolves half of our problems for our internal system integration, data retrieval, and subscription to specific events.

WHAT IS MOST VALUABLE?

A valuable feature is its integration with Oracle Database. We have another system running Oracle Database which can be easily updated from the database and pushed to the middleware. Also, it easily connects to other Oracle products and services.

WHAT NEEDS IMPROVEMENT?

We need to have more adapters and connectors, especially healthcare system adapters. This solution doesn't have connectors to other external applications. We connect with other vendors' and other companies' systems, therefore we have been asking Oracle for specific interfaces because we have been unable to integrate with these systems using any adapters.

FOR HOW LONG HAVE I USED THE SOLUTION?

More than five years.

WHAT DO I THINK ABOUT THE STABILITY OF THE SOLUTION?

It is stable.

[Read 7 reviews of WebLogic Suite](#)

WHAT DO I THINK ABOUT THE SCALABILITY OF THE SOLUTION?

Scaling is costly.

HOW IS CUSTOMER SERVICE AND TECHNICAL SUPPORT?

Technical support is very costly. We tried to connect our healthcare systems with Oracle, and it needs a lot of support. We would need to hire a consultant, and the consultant would cost us \$4,000 a day. Therefore, it's very costly to integrate with the other systems, which is why we are looking for other alternatives.

HOW WAS THE INITIAL SETUP?

I was not involved in the initial setup.

WHAT'S MY EXPERIENCE WITH PRICING, SETUP COST, AND LICENSING?

In general, it is a costly solution.

WHICH OTHER SOLUTIONS DID I EVALUATE?

Microsoft.

WHAT OTHER ADVICE DO I HAVE?

I rate this solution as a seven out of 10, because it is not fully satisfying our needs. It is good in specific areas, but it's not satisfying all of our requirements. It is not a one stop shop. Most important criteria when selecting a vendor: It is affordable. Easy to use. Ready documentation, training, and examples.
